

CS3300 PROJECT NAME TEST REPORT

DATE

Blackjack Trainer:

Test Report Scope:

The main test strategy was to manually perform each test about 5 times(depending on test) in order to ensure quality of findings.

Test Team: Kai Garcia-Curran, Logan Morsman

Test Schedule: 9/20/2025 - 12/1/2025

- Most Recorded Unit and Integration Testing occurred November 30th - December 1st. Little to no bugs were found in this testing period
- Unrecorded testing where most bugs were immediately fixed
- System testing occurred when testing the github upload on 9/20, and the upload of the game to itch.io on 11/30

Test Description:

1. Build Github Repo
 - Tested successful push and pull of the project code to github
 - No flags
2. Deck Data Structure
 - Tested that down card correctly contributes to hand
 - No flags
3. Hand Data Structure
 - Tested that hands correctly spawn and contribute to counts
 - No flags
4. Player Hand Data Structure
 - Tested that cards correctly appear and contribute to count.
 - No flags
5. Dealer Hand Data Structure
 - Tested that cards correctly appear and contribute to count.
 - No flags
6. Deck Asset
 - Tested that deck asset appears
 - No flags

 - Tested the presence of each strategy tooltips
- 14. Mode selection menu
 - Tested that each mode selection button leads to the correct mode
 - No flags
- 15. Standard mode
 - Tested that standard mode functions correctly. That the count math is correct, and wins, losses and draws are appropriate.
 - No flags
- 16. Tutorial
 - Tested that tutorial text populates when clicking the tutorial button.
 - No flags
- 17. Strategy mode
 - Tested Strategy mode so that the main game functions correctly, as well as the hand ratings across different hands.
 - No flags

18. Card Counting mode

- Tested card counting mode to ensure that the running count is correctly updated
- Four flags. Resolved

19. Publish

- Testing if the game is uploaded and playable on itch.io
- No flags

Final product features and quality:

The final product is a functional blackjack trainer that contains 3 modes. Standard mode which allows you to play the game. Strategy Mode which gives you advice on whether to hit or stand as well as information on the strength of the dealer and players hand. Card counting mode keeps a running count which shows when the odds are in the players favor. There is also a tutorial mode that gives basic information on how the game works.

Test Flags and Risk Management:

- Dealer's hidden card updated card count twice
- 9s affected card count
- Card count did not count dealer's hidden card
- Count disappeared when comparing hands

There are no remaining open flags. All have been resolved

Lessons Learned from testing:

It is helpful to be proactive about fixing bugs. They can be resolved quickly and it won't interfere with future codes.
